Summary

- Full Stack Developer with 8+ years of experience designing and delivering scalable cloud-native applications using Python, TypeScript, React, Next.js, FastAPI, GraphQL, and AWS.
- Experienced in building conversational AI and customer-facing intelligent applications, integrating backend services, and deploying production-ready solutions on modern cloud infrastructure.
- Passionate about Generative AI, LLM-powered applications, agentic workflows, and scalable software architecture.
- Proven track record leading technical initiatives, mentoring developers, and collaborating with cross-functional stakeholders to deliver high-impact business solutions.

Education

BE in Computer Science and Engineering

Aug 2013 – Jul 2017

The Oxford College of Engineering, Visvesvaraya Technological University - India

Technical Skills

Programming Language: JavaScript (ES6+), TypeScript, Python, JAVA

Frontend Frameworks & libraries: React, React Native, Next.js, Tailwind CSS, Chakra UI, Material UI, HTML5, CSS3/Sass, Vite

Backend: Node.js, TypeScript, Express, Fastify, Apollo GraphQL, REST APIs, FastAPI, Redis

Database: MongoDB, DynamoDB, PostgreSQL, MySQL, ClickHouse

Deployment & Infra: Azure DevOps, AWS (Lambda, S3, CloudFront, Cognito, CloudWatch, Route53), Docker, Kubernetes, Jenkins, GitLab CI/CD

Cloud & DevOps: AWS, Docker, Kubernetes, GitLab, Azure DevOps, Jenkins

Tools & Platforms: Kafka, Keycloak, Jira, Confluence, Storybook, Figma, Agile methodologies

Generative AI & AI Engineering: OpenAI APIs, LLM Integrations, Prompt Engineering, Conversational AI, RAG Concepts, AI Agent Workflows, Vector Databases (Learning/Exploring Pinecone and Similar Technologies)

Experience

Full Stack Developer

Aug 2024 – Jan 2026

Prathama SRL – Brussels, Belgium

- Developed and maintained scalable front-end applications using **React**, supported by unit testing and end-to-end testing frameworks to ensure high-quality user experiences.
- Designed and implemented backend services using **Python, FastAPI, and Pydantic**, enabling secure and high-performance API integrations.
- Collaborated with business stakeholders to translate requirements into production-ready software solutions.
- Orchestrated CI/CD integration by configuring **Azure DevOps pipelines**, achieving a 98% test automation success rate across builds.
- Built automated testing frameworks using **Playwright and Python**, increasing test coverage by 30%.
- Contributed to architectural decisions, code reviews, and engineering best practices across development teams.

Full Stack Developer

Jan 2022 – July 2024

Chatlayer by Sinch – Antwerpen, Belgium

- Designed and delivered **conversational AI applications** serving enterprise customers across multiple industries.
- Built and maintained customer-facing interfaces for chatbot and AI-driven communication platforms.
- Migrated legacy JavaScript applications to **TypeScript and Apollo GraphQL**, improving platform performance by 30%.
- Architected and deployed **micro frontends** and **serverless architectures** using AWS (Lambda, CloudFront, Cognito).
- Improved system scalability and reliability by designing, implementing, and maintaining distributed backend systems using **Node.js**, and deploying them with **Docker and Kubernetes** for high availability and efficient delivery.
- Developed scalable frontend applications using **React, Next.js, TypeScript, Chakra UI**, and modern component-driven architecture.
- Worked in **Agile** cross-functional teams, collaborating with product, design, and backend teams.
- Exposure to Large Language Models (LLMs), prompt engineering, and AI-assisted workflows.
- Familiar with Retrieval-Augmented Generation (RAG), vector databases, and agent-based architectures.
- Mentored junior developers and participated in technical design discussions and code reviews.

Full Stack Developer

Sept 2017 – Oct 2021

DXC Technology – Bengaluru , India

- Developed responsive frontend apps using **React, TypeScript, and Material UI**, improving UI load times by 20%.
- Built serverless APIs on **AWS Lambda with DynamoDB**, supporting 3,500+ daily active users.
- Configured **AWS Contact Flows and Amazon Connect** , building customizable interfaces and enhancing customer interaction workflows with tools like Amazon Connect Control Panel (CCP).
- Automated regression testing using **Selenium (Java)**, cutting execution time by 35%.
- Managed **Jenkins** automation jobs, reducing test execution failures by 40 %.
- Led **Customer Acceptance Testing (CAT)**, ensuring 100% compliance with business requirements and achieving a zero-defect product launch.

Certifications

- AWS Certified Generative AI Developer - Professional – AWS (Ongoing)
- React 18 Certification, Java 17 Masterclass, Complete Web Development Bootcamp, Selenium WebDriver (Java), Playwright Automation Testing – Udemy

Language

English: Fluent (Spoken and Written)

Dutch: Basic proficiency (spoken and written); currently pursuing level 2.1
